Lola Van Vooren

Game Programming Student - Gameplay and Tools

About Me

I'm a Belgian Video Game Programmer eager to get work experience in the field. I'm very self-taught having learned both English and drawing on my own. I've been into game development and other creative mediums for a long time. I mainly work on gameplay systems and small tools, whether it'd be in C++ or C#.

Experience

2024-Today - Developing solo game projects

- Have been working on multiple projects over the years
- Able to stay committed on long-term projects
- Keeping track of those with documents and dev-logs
- Also worked on team projects during game jams

2021-Today - Art Freelancer

- Self-taught Artist
- Able to hone skills over time with practice
- Managing multiple accounts with a combined 2k followers
- Taking art commissions

2022-2023 - Community Management

- Managed a Discord server about a Minecraft modded server with 2k+ members as an admin
- Said server eventually got official Discord Partnership
